

ISO-KINETIC SAMPLING CHECKLIST

J-PAL Industry ID					
Industry Name					
Stack Number with Stack Name					
Name of the environmental laboratory performing sampling					
Lab's team lead's name					
Lab team No.		Date		Time	

	Sr.	Check	Response	Remarks
Kit Number	1.1	Calibrated sampling kit number		
Other Equipments & positioning	2.1	Flue gas analysis	Device used <input type="checkbox"/> Portable gas analyzer <input type="checkbox"/> Orsat <input type="checkbox"/> Not used	
	2.2	Item present in the Impinger	Chilled water	<input type="checkbox"/> Yes <input type="checkbox"/> No
	2.3		Silica gel	<input type="checkbox"/> Yes <input type="checkbox"/> No
	2.4		Silica gel color	<input type="checkbox"/> Blue/Pink <input type="checkbox"/> Grey <input type="checkbox"/> NA
	2.5	Are these equipments positioned at the stack platform	Sampling kit	<input type="checkbox"/> Yes <input type="checkbox"/> No <input type="checkbox"/> NA
	2.6		Impinger	<input type="checkbox"/> Yes <input type="checkbox"/> No <input type="checkbox"/> NA
	2.7		Dry gas meter	<input type="checkbox"/> Yes <input type="checkbox"/> No <input type="checkbox"/> NA
	2.8		Pump	<input type="checkbox"/> Yes <input type="checkbox"/> No <input type="checkbox"/> NA
	2.9		Convenient to take equipment to the platform?	<input type="checkbox"/> Yes <input type="checkbox"/> No <input type="checkbox"/> NA
Steps for sampling	3.01	Stack diameter		
	3.02	Stack temperature		
	3.03	Thimble number		
	3.04	Area of the selected nozzle		
	3.05	Sampling: start time		
	3.06	Sampling: finish time		
	3.07	Pre-leak test performed	<input type="checkbox"/> Yes <input type="checkbox"/> No <input type="checkbox"/> NA	
	3.08	Post-leak test performed	<input type="checkbox"/> Yes <input type="checkbox"/> No <input type="checkbox"/> NA	
	3.09	Inclined manometer adjusted	<input type="checkbox"/> Yes <input type="checkbox"/> No <input type="checkbox"/> NA	

3.10	No. of traverse points used for velocity calculation		
3.11	No. of traverse points used for sampling		
3.12	Marking of traverse point proper (collar length considered)	<input type="checkbox"/> Yes <input type="checkbox"/> No	
3.13	Sampling probe, pitot tube and thermocouple clamped together	<input type="checkbox"/> Yes <input type="checkbox"/> No <input type="checkbox"/> NA	
3.14	Gas analyzer used to calculate Molecular weight	<input type="checkbox"/> Yes <input type="checkbox"/> No	
3.15	Molecular weight corrected with moisture percentage	<input type="checkbox"/> Yes <input type="checkbox"/> No	
3.16	Molecular weight after correction		
3.17	LPM set at (for PM chamber)		
3.18	LPM set at (for gas chamber)		
3.19	LPM observed @ time		
3.20	DGM initial reading		
3.21	DGM reading observed @ time		
3.22	DGM final reading		
3.23	Sampling probe / pitot tube held horizontally (should be at 90 degrees from stack)	<input type="checkbox"/> Yes <input type="checkbox"/> No <input type="checkbox"/> NA	
3.24	Nozzle in the direction of flow (Assuming port to be the centre of clock, nozzle should be at 6 o' clock)	<input type="checkbox"/> Yes <input type="checkbox"/> No <input type="checkbox"/> NA	
3.25	Thimble stored in thimble cover	<input type="checkbox"/> Yes <input type="checkbox"/> No	

CALCULATION SHEET

Sample No.		Pitot Constant		DGM Calibration Factor	
Thimble No.				Initial Weight of Thimble	

1.	Barometric Pressure (mm of Hg)	:									
	Leak check of Pitot	:	1) <input type="checkbox"/> Done 2) <input type="checkbox"/> Not Done								
2.	Traverse points in cm	:		T1	T2	T3	T4	T5	T6	T7	T8
			From Wall								
			With Collar								
3.	Composition in Flue Gas	:	CO ₂								
			O ₂								
			SO _x								
			NO _x								
			N ₂ +CO								
4.	Dry Molecular Weight of Flue	:									
5.	Moisture Content (%)	:									
6.	Wet Molecular Weight of Flue	:									
7.	Stack Temperature of Flue	:	T1	T2	T3	T4	T5	T6	T7	T8	
			°C								
			K								
8.	Differential Pressure (mm of WC)	:	T1	T2	T3	T4	T5	T6	T7	T8	
9.	Static Pressure (mm of WC)	:	T1	T2	T3	T4	T5	T6	T7	T8	

10.	Absolute Static Gas Pressure (mm of WC)	:	T1	T2	T3	T4	T5	T6	T7	T8
11.	Velocity of Flue Gas (m/sec)	:	T1	T2	T3	T4	T5	T6	T7	T8
12.	Discharge at Nozzle (m3/sec)	:	T1	T2	T3	T4	T5	T6	T7	T8
13.	Initial Temperature at Meter	:								
14.	Initial Vacuum	:								
15.	Flow rate at Meter (LPM)	:	T1	T2	T3	T4	T5	T6	T7	T8
16.	Initial DGM reading (m3)	:								
17.	Time Duration of Sampling (minutes)	:	T1	T2	T3	T4	T5	T6	T7	T8
18.	Volume of Gas Passed (m3)	:	T1	T2	T3	T4	T5	T6	T7	T8
19.	Final Vacuum (mm of Hg)	:	T1	T2	T3	T4	T5	T6	T7	T8
20.	Final reading of DGM (m3)	:								
21.	Volume recorded in DGM (m3)	:								
22.	Final Temperature at Meter (K)	:								
23.	Normalized Calculated Volume (m3)	:								
24.	Normalized DGM Volume (m3)	:								
25.	Isokineticity	:								
26.	Final Weight of Thimble	:
